[OE. *stíweard*, *stiȝweard*, f. *stiȝ* of uncertain meaning + *weard* keeper, WARD *sb.*

The word is not found in any MS. earlier than the 11th c., and the form *stiȝweard*, though certainly the original, is recorded only in a late transcript. The first element is most probably OE. *stiȝ* a house or some part of a house (cf. *stiȝwita* house-dweller); this is doubtless cogn. with *stiȝu* STY *sb.* and *stíȝan* to climb (STY *v.*), but there is no ground for the assumption that *stiȝweard* originally meant 'keeper of the pig-sties'.

The Eng. title is quoted by Froissart in the OF. form *estuard*. The rare ON. *stívarðr* is adopted from OE.

Since the 16th c. the definitions of the word have often been influenced by the supposed etymologies *stead* + *ward* and *stow* + *ward*.]

3. a. (Lord High) Steward or † **Great Steward of England.** Recorded since the 15th cent. as: The title of a high officer of state, the earlier *senescallus Angliae*. Since the accession of Henry IV this officer has been appointed only on the occasion of a coronation, at which he presides, or for the trial of a peer, which takes place in the *Court of the Lord High Steward* if Parliament be not sitting.

Originally this office seems to have carried little more than the privilege of waiting on the king's table, especially on state occasions. But it soon became hereditary in the earls of Leicester, and powers similar to those of the French *seneschal* were claimed for it by Simon de Montfort. This development was checked by the attainder of Simon, and the office finally fell in to the crown by the accession of its holder Henry IV.

The office, described as *senescallatus Scotiae* in a charter of Malcolm IV, 1158, fell in to the crown upon the accession of Robert the Steward as Robert II, whence the name of the royal house of Stuart; but the title was given to the heir-apparent until the Union. *Great Steward of Scotland* is now a title of the Prince of Wales.

Teut. root **stik-* to pierce, be sharp (whence STICK, STITCH *sbs.*):—Indogermanic **stig-* (:**steig-*) found in Gr. *στίζειν* (:—**stigy-*) to prick, *στιγμή, στίγμα* prick, point (see STIGMA), L. *instīgāre* to spur on, INSTIGATE; also with nasal infix, in Goth. *stigqan* to thrust, L. *-stinguĕre* to prick (*distinguĕre* to distinguish); and without initial *s* in Skr. *tij-* to be sharp, *tigmá* sharp. The Teut. root chiefly appears in the altered form **stek-* (**stak-*: **stēk-*), as in the Com. WGer. strong verb **stekan* to prick, thrust: see STEEK *v.* The formal equivalent of OE. **stician* (WGer. type **stikōjan*, **stekōjan*, prob. denominative) occurs in OHG. *stehhôn* to prick, stab, cut the throat of; a parallel formation (WGer. type **stikkjan*, also prob. denominative) is found as (M)Du., (M)LG. *stikken* to prick, pierce, stab, also to embroider (Sw. *sticka*, Da. *stikke* from LG.), OHG. *sticchen* in the same senses (MHG., mod.G. *sticken* to embroider).

It is impossible accurately to separate the history of this originally weak verb from that of the originally strong STEEK *v.*[2] The latter was from an early period sometimes conjugated weak, while on the other hand the strong inflexions of *steek* became associated with *stick*, which, moreover, in the 16th c. formed a new strong pa. t. and pa. pple. *stuck* (cf. *dig, dug*). It is therefore often doubtful to which verb forms like *stack, stoken*, should be referred. Further, in some northern dialects the ME. *stīke* is normally represented by *stēke*, and therefore coincides (at least graphically) with STEEK *v.*[2] The wk. form *sticked* remained in somewhat common use until the 17th c., and still survives (in certain senses) in Sc. and various dialects (see *Eng. Dial. Dict.*).]

A. *adj.*

1. Motionless; not moving from one place, stationary; also, remaining in the same position or attitude, quiescent. a. as *predicate* or *complement.*

In *stond, sit, lie still* the word may be taken either as adj. or adv. In OE., however, there is evidence that in these collocations it was sometimes adv., and no evidence that it was ever adj., the constant form being *stille* (which always admits of being regarded as adv.), never *stillu,* which would be the proper form of the adj. when the subj. is fem. sing. or neut. pl. Further, in OS. and OHG. the adv. *stillo,* not the adj., is used with the verb 'to stand'. These phrases are therefore treated under STILL *adv.* I.

1. Birth of a still-born child; an instance of this. Also *fig.* Also, formerly, birth of a child alive or with a beating heart, but not breathing.

Midwifery* xxxvii. 397 The infant is born in a state of suspended animation—its heart continues to beat, but it makes no effort to breathe or to move. 'Still birth' is therefore not the same thing as the child's being born dead, although death may supervene if prompt treatment is not applied. **1920** O. ST. J. MOSES *Man. Obstetr.* xviii. 269 In the pale or white form of still-birth the chances of recovery are much less. **1940** BROWN & GILBERT *Midwifery* l. 468 In certain circumstances, the fœtus continues to live as a fœtus external to the mother for some time—10 to 20 minutes—and it may die as a fœtus and be counted as a still-birth. **1947** G. I. STRACHAN *Textbk. Obstetr.* VIII. 699 The term 'stillborn' is therefore applied when the fœtus fails to maintain an independent existence, although some authorities.. have attempted to make a division into (*a*) dead birth in which the fœtus is obviously dead and exhibits neither heart beat nor respiration, and (*b*) stillbirth in which the heart is beating but respiration is never established. It is simpler, however, to employ the term 'stillbirth' to cover both these states. **1971** *Reader's Digest Family Guide to Law* 197/2 Even a still-birth—where a child is born dead after at least 28 weeks of pregnancy—must be registered as a birth. **1972** S. G. CLAYTON et al. *Obstetrics by Ten Teachers* (ed. 12) liii. 642 If the heart is beating after delivery, even though there is no sign of respiration, the death of a child born after 28 weeks should not be included as a stillbirth but as a neonatal death.

2. A still-born child.

In certain uses this vb. closely approaches in meaning the etymologically unrelated STENT *v.*[1] Apparently some confusion has taken place between the two verbs, and as the phonetic variants *stent*, *stint* are common to both, it is sometimes doubtful to which verb a particular use belongs.]

Stirling[1] ('stɜːlɪŋ). [The name of the Revd. Robert *Stirling* (1790–1878), Scottish minister and engineer.] ***Stirling*** (or ***†Stirling's***) ***cycle***, the thermodynamic cycle on which an ideal Stirling engine would operate, consisting of an isothermal expansion, a drop in temperature at constant volume by giving up heat to a regenerator, an isothermal compression, and an increase in temperature at constant volume by gaining heat from the regenerator; ***Stirling*** (or ***†Stirling's***) ***engine***, orig., an external-combustion air engine invented by Stirling (*Brit. Pat. 4081* (1816)); more widely, a mechanical device used to provide either power or refrigeration and operating on a closed regenerative cycle, the working fluid being cyclically compressed and expanded at different temperatures; also *ellipt.* as ***Stirling***.

Stirling[2]. The name of Allan *Stirling* (1844–1927), Scottish-born American engineer, used *attrib.* to designate a water-tube boiler invented and patented by him (*U.S. Pat. 381,595* (1888)), usu. consisting of three interconnected upper steam and water drums and one or two lower water drums, connected by banks of inclined water-tubes which are heated by combustion gases and bent to enter the drums radially.

Stirling[3]. *Math.* The name of James *Stirling* (1692–1770), Scottish mathematician, used *attrib.* and in the possessive to designate concepts in the theory of numbers, as **Stirling('s) approximation** or **formula**, either of two functions of an integer n which are approximations for factorial n when n is large, viz. $n! \sim n^n/e^n$ and (more accurately) $n! \sim \sqrt{(2\pi n)}n^n/e^n$; **Stirling('s) number**, a member of either of two arrays used in combinatorics, first described by him (*Methodus Differentialis* (1730)), *spec.* (*a*) the number of ways of arranging the integers 1 to m in n disjoint non-empty ordered sets, the first element of each ordered set being the least; (a Stirling number of the first kind); (*b*) the number of ways of partitioning the integers 1 to m into n disjoint non-empty sets; (a Stirling number of the second kind).

1875 GALTON in *Contemp. stirpiculture ('stɜːpɪˌkʌltjʊə(r)). [f. L. *stirpi-* (see STIRP, STIRPS) + *cultūra* CULTURE *sb.*] The production of pure races or stocks by careful breeding.

1870 J. H. NOYES *Sci. Propagation* 12 It is one thing to seek in any existing race the best animals we can find to breed from..; and it is another thing to start a distinct family and keep its blood pure by separation from the mass of its race. It is this last method that has produced the Ayrshires, the short-horns, and the Leicesters. VI. A fund, store.

The senses grouped under this head are not found in the other Teut. languages except by adoption from English. Their origin is obscure, and possibly several different lines of development may have blended. Thus the application of the word to a trader's capital may partly involve the notion of a trunk or stem (branch I) from which the gains are an outgrowth, and partly that of 'fixed basis' or 'foundation' (branch II): cf. FUND. Sense 47 may be derived immediately from that of 'money-box', and have given rise to uses coincident with senses of different origin. The application to cattle is primarily a specific use of the sense 'store', but the notion of 'race' or 'breed' (sense 3) has had some share in its development.

52. a. The subscribed capital of a trading company, or the public debt of a nation, municipal corporation, or the like, regarded as transferable property held by the subscribers or creditors, and subject to fluctuations in market value. Also, in particularized sense, a kind of stock, a particular fund in which money may be invested.

In expressions like *to buy or sell stocks*, the word may be partly an application of sense 42, 'tally'. Cf. quot. 1714 under that sense.

In modern British use the application of the word is narrowed; the subscribed capital of a public company is called *shares* when it is divided into portions of uniform amount, and *stock* when any desired amount may be bought or sold. In British use, also, when there is no specific indication, *stock* is usually taken to refer to those portions of the National Debt, the principal of which is not repayable, the government being pledged only to the payment of interest in perpetuity.

stole (stəʊl), *sb.*[2] Also 5-6 stoole, 6 stoolle, stowle. [Commonly identified with STOLE *sb.*[1], to which the unauthenticated sense of 'royal robe' is assigned. But there seems to be little doubt that the 'stole chamber', served by the Groom or Yeoman of the Stole, was originally the room containing the king's close-stool, and that the word is properly a variant of STOOL *sb.*[1] As, however, the word as thus used was for centuries entirely dissociated from *stool,* and latterly had a different spelling, it is necessary to treat it separately.

In accounts of coronation ceremonies the king is said to have worn an ornament resembling a stole (STOLE *sb.*[1] 2); but it does not appear that this was actually *called* a 'stole' until modern times. The view that the Groom of the Stole derived his designation from this ornament is quite improbable.

Sir H. Nicolas's supposition, that the 'stole' was a kind of packing-chest, is a mistaken inference from the *stole* and *male* being mentioned together in certain documents.]

1. ***groom of the stole***: the title of a high officer of the king's household (formerly sometimes also in the household of a prince of the blood), ranking next below the vice-chamberlain of the household. Also †***yeoman of the stole.***

For the duties of the office as understood at various times, see the quots. In the household of a queen or a princess, the office and title were held by a lady. Under Queen Victoria no groom of the stole was appointed, and the office has not since been revived.

stomacher[1] ('stʌmətʃə(r), 'stʌməkə(r)). Forms: 5 stomakere, stomechere, stomachyr, 5–6 stomachere, 5–6, 8 stomager, 6 stomackger, (8 stomatcher), 6– stomacher. [app. f. STOMACH *sb.* + -ER[1]: but see below.

The alleged F. *estomachier* appears to be recorded only by Palsgrave. If it be genuine, and the source of the Eng. word, it would account for the pronunciation ('stʌmətʃə(r)), which is given in the pronouncing dictionaries of Kenrick (1773), Sheridan (1780), Walker (1791), Smart (1836), Worcester (1860), in Cassell's *Encyclopædic Dict.* (1888), and in *Webster's Dict.* (1828-1886). The genuineness of this pronunciation is attested by the spellings *stomager* (1450, 1727), *stomackger* (1575), *stomatcher* (17..), and *stomacher* (*c* 1450 onwards): the spelling with *k* is evidenced only once (*c* 1466), though the word occurs frequently in writers who wrote the word *stomach* with *k*. The pronunciation ('stʌməkə(r)) was given by Ogilvie *Imperial Dict.* (1850) and appears in later editions of that work and in recent U.S. dicts. It is not impossible that *estomachier* was really formed in late Anglo-French, and is the source of the Eng. word. For the sense cf. the misuse of *stomach* for 'chest' (STOMACH *sb.* 3).]
